PROFESSIONAL SUMMARY

Versatile UI/UX Designer with hands-on experience across enterprise dashboards, brand systems, and AI-augmented prototyping. Uses Figma AI and low-code tools (Lovable) to move from concept to testable prototype quickly, reducing client revision cycles. Sole designer at SJ Innovation since February 2026, independently owning all client and internal design work.

TECHNICAL & CORE COMPETENCIES

- **UI/UX Design:** Figma (Design Systems, AI agents), Responsive Web Layouts, User Flow Mapping, Wireframing, Interactive Prototyping
- **Advanced Tech & AI Integration:** Ollama, Replicate API, Low-code Prototyping (Lovable, Bolt.new), Google Antigravity, Claude Code (MCP-based tool orchestration, e.g. Ollama-to-Figma workflows), WordPress Administration
- **Visual Production:** Adobe Creative Suite (Illustrator, Photoshop), Brand Identity Systems, Vector Illustration, Print Layouts, Digital Marketing Assets (Meta ads, Carousels)

PROFESSIONAL EXPERIENCE

UI/UX Designer | SJ Innovation LLC

September 2025 – Present

- Sole designer at SJ Innovation since February 2026, owning client and internal design work across the company
- Designed complete visual identity systems for 10+ AI-native Control Tower products (ePhysician, Marketing AI, MortgageAI, RealtorHelp, HR CT, Agency CT, NonProfit AI) and delivered high-stakes client projects under tight deadlines: InfoFluence diagnostic reports (McKinsey-style aesthetic for AWS presentations), StoryGrooveAI landing page optimization
- Scaled the LuCreativ theme-park client account from an initial multi-venue engagement to sustained near-daily production across 7+ properties (Six Flags St. Louis, Valleyfair, Michigan's Adventure, Worlds of Fun, Schlitterbahn Galveston, Enchanted Parks) spanning digital, OOH, and paid-display formats — consistently praised by the client for quality and fast turnaround
- Designed the logo for Queens AI Week, an event partnership between the Queens Chamber of Commerce, SJ Innovation, and Firstlight Cloud Xchange
- Designed ICR Debt Surveillance — a Bloomberg Terminal-style dashboard for credit investors, including a 15-module data layout, alert indicators, and investor-facing data visualizations
- Alyssa Kristin (luxury bridal SaaS) — designed three separate experiences (mobile Stylist App, Admin CMS, CRM) as one connected system, translating complex operational requirements into functional prototypes using Figma AI agents and low-code deployment
- Manually redesigned AI-generated visual output in Figma to remove generic template patterns, then rebuilt and deployed the site using Google Antigravity and hand-coded refinements via Git/GitHub Pages
- WordPress: Hands-on content publishing, plugin administration, and technical troubleshooting; custom HTML.
- Built and executed Meta ad campaigns (ePhysician, NonProfit AI) from sales lead data: segmented leads into custom audiences, configured targeting across campaign, ad set, and ad level in Ads Manager, and designed ad creatives that generated 5 form submissions on day one (previous creatives ran 4 days with 0 clicks)
- Built functional front-end prototypes using low-code platforms (Lovable) to validate design decisions with stakeholders before development, reducing revision cycles and accelerating time-to-market
- Implemented a local AI workflow prototype (Ollama/Perplexica) for competitive UX analysis and set up ComfyUI workflows with safetensors models to generate images locally
- Recognized by a senior business analyst for ownership mindset: proactively delivering work with integrated self-critique and recommended improvements, streamlining review cycles
- Led a full UI/UX redesign of CollabAI's multi-agent platform, replacing a cluttered, neon-heavy interface with a clean, minimal design; implemented live AI chat with real model provider integrations (Groq, Gemini, OpenRouter) and user access controls, tested across desktop and mobile browsers
- Rebuilt personal portfolio with a custom brand identity and migrated off Lovable/Supabase to Cloudflare Pages, with automated GitHub-based deployments and zero ongoing cost, with full SEO setup (sitemap, robots.txt, canonical metadata) and confirmed Google indexing via Search Console

- Rebuilt underperforming Meta ad creatives for a B2B healthcare automation product (ePhysician) — replaced generic stock imagery and cluttered layout with custom, brand-consistent visuals and a single clear CTA — turning a 0-lead, 4-day campaign into a sustained ~2–3.5 leads/day pipeline on the same ad budget
- Led a comprehensive on-page SEO audit across the Control Tower landing page portfolio and CollabAI/BuildYourAI landing pages (6+ pages, 4 product verticals), identifying duplicate canonical URLs, a sitewide heading markup issue, and cross-page data inconsistencies (e.g. mismatched agent counts) — producing a prioritized, template-level fix plan

Intern Graphic Designer | SJ Innovation LLC

May 2025 – September 2025

- Orchestrated a digital asset pipeline supporting US-based global campaigns: developed 200+ high-engagement digital and print collateral pieces (targeted Meta ads, optimized LinkedIn carousels, large-format corporate event banners, internal office installations) for multicultural marketing initiatives and product launches

Freelance Graphic & Brand Designer | Freelancer

March 2025 – April 2025

- Completed 4 client engagements for US-based businesses (edtech branding, physical store signage, gym marketing collateral) during post-graduation period, delivering logo designs and brand systems with 100% on-time delivery

KEY PROJECTS & ENDEAVORS

Campus Rebranding & Digital Infrastructure (Munshiganj Polytechnic Institute)

- **Spearheaded end-to-end visual branding overhaul** for campus ceremonies, providing professional print suites (signage, custom recognition materials) and establishing standardized digital guidelines across social media.
- **Developed and deployed a fully functional custom website** on Wix to digitize unit resources, while managing multi-channel social growth and high-impact marketing collateral over three years.
- **Designed foundational brand identity** for the new campus Computer Club, including custom logos, typography, and automated social media layout frameworks to ensure consistent visual presence across all platforms.

NEXURA – Brand Identity System (Final Capstone Project)

Adobe Illustrator · Photoshop

- Led end-to-end brand identity development: designed custom logo system (multiple mark variations), developed comprehensive 40-page brand guideline document, and created application mockups across 20+ touchpoints (stationery, packaging, digital interfaces, signage, vehicle wraps).
- Established typographic hierarchy, color psychology framework, and usage standards to ensure visual consistency across all media applications.
- Delivered formal presentation to faculty evaluators, articulating strategic rationale for all design decisions.
- Scored 4.0 in 8th semester evaluation.

PROFESSIONAL CONTRIBUTIONS & ACHIEVEMENTS

- **Client Impact & Ownership:** Took full ownership of the StoryGroove project during its critical launch phase, working late nights and weekends to deliver on tight deadlines. Client feedback praised the designs as "clean, thorough, and easily accessible," leading to repeat engagement and a strengthened relationship with SJ Innovation
- **Brand Consistency Ownership:** Have led SJ Innovation's visual brand consistency since probation — spanning the Control Tower product suite, internal culture materials, and company-wide presentations — including authoring the current brand guidelines from concept to implementation (POM social media creatives, Birthday carousels)
- **Operational Resilience:** Repeatedly stepped in during critical, short-notice periods (Restock Resource, weekend coverage during a teammate's family emergency) to maintain project continuity and client satisfaction under extreme deadline pressure — including ~15 hours of documented after-hours and weekend work logged over a single three-week stretch to protect a client's delivery deadlines
- **Collaboration & Knowledge Sharing:** Team members described collaborative approach as "pillars and compass," citing significant learning improvements from working together
- **UX Problem Solving:** Fixed a button-placement and color issue on the Calysta Pro CRM email campaign page that was creating layout confusion — colleague specifically credited the improved usability
- **Technical Agility:** Edited a webinar video under a 24-hour deadline; also delivered large-format event collateral and social media suites under tight recurring timelines
- **Culture & Events:** Led design and execution for SJ Innovation's 22nd Anniversary celebration — crest/trophy designs, zoom backgrounds, decorative merchandise (gift box, bag stickers, portrait cards), event props, and photo/video capture — recognized by HR leadership for creativity and dedication

PERSONAL INTERESTS & INTELLECTUAL PURSUITS

- **Film & Narrative Exploration:** I am drawn to films that explore the complexity of human behavior and emotion, works by directors like Tarkovsky, Kurosawa, Von Trier, and Park Chan-wook. Watching these stories unfold is my way of observing experiences and perspectives I would never encounter otherwise, helping me better understand how people think, feel, and make decisions.
- **Music & Artistic Expression:** My listening spans a wide range, from the atmospheric depth of post-rock (Godspeed You! Black Emperor, Sigur Rós) to the raw intensity of extreme metal (Paysage d'Hiver, Ulver) and the lyrical precision of conscious hip-hop (Kendrick Lamar, MF DOOM). Music is where I go to process ideas and emotions outside of work.
- **Writing & Creative Discipline:** Since 2017, I have written poetry under various pseudonyms, exploring themes like cosmic horror, divinity, and the limits of human understanding. I write occasionally on weekends now, but the practice of building conceptual worlds from abstract ideas remains central to how I think and process information.
- **Physical & Spiritual Practice:** I maintain discipline through bodyweight training using whatever is available: running, climbing the 10 floors of my building multiple times on weekends, and conditioning work like punching drills with wrapped fists. I am also deepening my understanding of theology and religious history, including perfecting my Quranic recitation for salah.
