

GHL Developer Control Tower

Welcome to GHL Control Tower — the AI-powered command center for GoHighLevel agencies. Stop tab-hopping across 20+ sub-accounts. Run your entire agency from one intelligent dashboard.

THE PROBLEM

Running a GHL Agency Shouldn't Feel Like Running 20 Businesses

Tab-Hopping Hell

Log in/out of 20+ sub-accounts just to check MRR

No Unified Revenue View

Can't see total agency MRR without a spreadsheet

Broken Automation Blindness

Client workflows stall, you find out too late

Voice AI Misfires

Agent configuration errors discovered by angry clients

Lost Meeting Intelligence

Action items buried in Zoom transcripts

Support Chaos

Tickets scattered across Slack, email, WhatsApp

IMPACT

Managing 20 Sub-Accounts = 20 Logins, Zero Clarity, Constant Firefighting

THE SOLUTION

One Login. Every Sub-Account. Total Clarity.

Revenue. Automations. Voice AI. Meetings. Support. All in one dashboard.

REVENUE COMMAND CENTER

Aggregated MRR, transactions, refunds across all sub-accounts

AUTOMATION HEALTH MONITOR

See which workflows are firing, stalled, or broken

VOICE AI STATION

Manage all GHL Voice AI agents, validate configurations

AI AGENTS & CHAT

GPT-5, Gemini 2.5 — no API keys needed

MEETINGS & INTELLIGENCE

Google Calendar + Zoom transcripts → auto-summaries + action items

NATIVE SUPPORT TICKETS

Built-in ticketing, no third-party tools required

REVENUE COMMAND CENTER — SEE YOUR ENTIRE AGENCY

MRR

Aggregated Revenue. Every Sub-Account. One Screen.

Revenue Features

Aggregated Agency MRR

Total recurring revenue across all sub-accounts

Transaction Tracking

See every payment, refund, subscription change

Monthly-Normalized Formula

Handles subscriptions, one-offs, annual plans correctly

Sub-Account Drill-Down

Click any location to see client-specific revenue detail

Churn & Growth Visibility

Track which clients are growing vs. declining

Results

MRR visibility: 15+ manual logins →
One dashboard view

Revenue reconciliation: 2
hours/week → Real-time accuracy

Financial reporting: End-of-month
chaos → Live agency health score

AUTOMATION HEALTH MONITOR

See Which Workflows Are Broken. Across Every Sub-Account. Instantly.

Automation Monitoring Features

Workflow Status Grid

Firing, Stalled, Broken — visual status per automation

Instant Failure Alerts

Get notified when workflows stop working

Location Health Scores

Per-sub-account automation health at a glance

Real-Time Sync Status

See which automations last triggered and when

Proactive Problem Detection

Catch issues before clients complain

Impact

Problem detection: Reactive (client calls) → Proactive (you see it first)

Client satisfaction: Firefighting → Prevention

Support load: Chaos → Controlled monitoring

VOICE AI STATION — MANAGE EVERY AI AGENT IN ONE PLACE

All Your GHL Voice AI Agents. Validated. Monitored. Configured Correctly.

Voice AI Station Features

Unified Agent Directory

See all Voice AI agents across all sub-accounts

Configuration Validation

Check duration limits, reminder timings, agent settings

Misconfiguration Alerts

Flag agents with incorrect settings before they cause problems

Client-Agent Mapping

Know which agents belong to which clients

Bulk Configuration Management

Update settings across multiple agents at once

Results

Agent visibility: Scattered across sub-accounts → Unified dashboard

Configuration errors: Discovered by clients → Caught before deployment

Management time: 30 min/week per client → 5 min/week for entire agency

MEETINGS & INTELLIGENCE – ZOOM TRANSCRIPTS → ACTION

ITEMS

Never Lose a Client Commitment in a 90-Minute Recording Again

Meeting Intelligence Features

Automatic Zoom Sync

30-day transcript ingestion, encrypted storage

AI-Generated Summaries

Gemini 2.5 Flash extracts key decisions, topics, next steps

Auto-Extracted Action Items

Tasks created with suggested owners and deadlines

Searchable Transcripts

Find exact moments in past calls by keyword or topic

Google Calendar Integration

One-way sync brings all meetings into unified view

Impact

Action items captured: Manual note-taking → AI extraction

Client commitments tracked: Lost in audio → Logged and searchable

Meeting follow-up: Forgotten → Automated task creation

REAL RESULTS — FROM CHAOS TO CONTROL IN 30 DAYS

What GHL Agency Owners Experience

Results Dashboard

MARCUS CHEN — 20-CLIENT GHL AGENCY — 30 DAYS

Weekly MRR Check Time:	90 minutes → 30 seconds
Broken Workflows Caught:	Reactive (client calls) → Proactive (3 flagged before clients noticed)
Voice AI Misconfigurations:	Discovered after 3 weeks → Caught immediately
Meeting Action Items Lost:	40% → 0% (AI extraction)
Team Access Control:	All-or-nothing → Scoped per location
Platform Cost:	\$49/month (Hosted SaaS)
Time Saved Annually:	6+ hours/week
Client Satisfaction:	Fewer firefighting calls, proactive problem resolution

TESTIMONIAL

"I went from firefighting 20 businesses to operating one agency. That's the difference."
— Marcus Chen, Owner, 20-Client GHL Agency, Austin, TX
