

TourDesk Control Tower

One operator-first platform to run a tour business.
Built on the SJ framework, remixable per client.

[Live Demo Available](#)

Live in 2 weeks

GDPR-ready

THE PROBLEM

Operators run their business across 6 tabs and a WhatsApp group.

Six Fragmented Systems

 **Bokun** — Bookings and inventory

 **Stripe** — Payment processing

 **Viator** — OTA channel #1

 **Google Calendar** — Schedule management

 **GetYourGuide** — OTA channel #2

 **Inbox / WhatsApp** — Guest communication

Critical Pain Points

Aggregated Agency MRR

Total recurring revenue across all sub-accounts

Transaction Tracking

See every payment, refund, subscription change

Monthly-Normalized Formula

Handles subscriptions, one-offs, annual plans correctly

THE VISION

One Control Tower. Every Channel. AI in the Loop.

AI AGENTS — YOUR TOUR OPS CREW

14 AI Agents. Running 24/7. On Top of Operator Data.

Featured Agents (5 currently live):

OB — Operations Briefing Agent

Surfaces the day's bookings, conflicts, weather, and at-risk trips on the Today screen — your morning standup, written for you.

RR — Review Reply Agent

Drafts on-brand replies to every review (Google, TripAdvisor, OTA), saved to the booking record.

GC — Guest Concierge Agent

Answers guest questions via email/WhatsApp using your product, policy, and FAQ content.

CR — Channel Reconciler Agent

Scheduled scan across OTAs and direct bookings — flags double-bookings and inventory drift before guests are affected.

IT — Inquiry Triage Agent

Reads inbound inquiries (web, email, WhatsApp), classifies trip type, drafts a personalized quote in minutes.

Coming Soon (9 additional agents)

Booking Email Drafter

Revenue Optimizer

Supplier Coordinator

Pre-Trip Communications

Post-Trip Follow-Up

Itinerary Optimizer

OPERATOR DASHBOARD — TOURISM-FIRST SCREENS

See what matters today — not buried in tabs.

Key Features Visible:

- Departure status indicators (✓ confirmed, ⚠ conflict, ⌚ pending)
- Guest count aggregation
- Channel source badges (Bokun, Viator, Direct)
- Payment status flags
- Quick-action buttons per booking

THE NUMBERS — WHAT CHANGES IN MONTH ONE

Real metrics from tour operators on Control Tower.

Four Key Metrics

<5 min — Inquiry First-Response Time

Before: 8–12 hours (next business day)

After: <5 minutes (AI triage + draft quote ready)

24/7 — Booking Response Coverage

Before: Business hours only (inquiries at 11pm wait until morning)

After: 24/7 automated inquiry handling

60% Less — Ops Time Per Trip

Before: 45 minutes per booking (coordination, emails, confirmations)

After: 18 minutes (AI handles routine comms + reconciliation)

3× Higher — Quote-to-Book Conversion

Before: 15% conversion (slow response, missed follow-ups)

After: 45% conversion (instant quotes, automated follow-up)

ARCHITECTURE — BUILT ON PROVEN FOUNDATION

Auth, multi-tenant RLS, integrations, AI core — proven across earlier products.

SJ Framework

Auth, RLS, profiles, roles, RAG, edge functions. Reused across products.

Tourism Layer

tour_products, bookings, availability, reviews, customers, channels — all RLS-scoped.

AI Agents

Briefing, Reply, Concierge, Reconciler, Revenue — logged in tour_ai_agent_runs.

ARCHITECTURE — BUILT ON PROVEN FOUNDATION

Auth, multi-tenant RLS, integrations, AI core — proven across earlier products.

Technology Stack

Products: Multi-product architecture with shared core

Channels: Bokun, Viator, GetYourGuide, Stripe, direct

Integrations: 21+ providers, extensible via UI

AI Agents: 5 live specialists (14 total in roadmap)

Users: Role-based access, location-scoped permissions

Branding: White-label ready, remix per client

Email: Transactional + agent-drafted communications

Audit: Full activity log on every action

Security & Compliance:

Row-Level Security on every table

GDPR-ready (self-hosted option available)

SOC 2 infrastructure

Encryption at rest & in transit

Audit log on every action

TWO-WEEK ROLLOUT — LIVE IN 14 DAYS

Live in 2 Weeks. Day by Day.

The Itinerary

01 — Days 1-4: **Connect**

API into TourPlan / Bokun / Rezdy
Import supplier catalog + rates
Wire inbound channels (email, web form, WhatsApp)

02 — Days 5-9: **Calibrate**

Inquiry agent trained on past 6 months of leads
Quote templates per trip type
Margin + commission rules configured

03 — Days 10-12: **Pilot**

Live with shadow mode (drafts go to sales lead first)
Tune tone + structure
Promote to auto-send for trusted templates

04 — Days 13-14: **Go Live**

24/7 quote coverage active
Supplier coordination + traveler
comms enabled
Weekly conversion + ops-time
review

Results After Go-Live:

<5 min first-response time
24/7 booking response
-60% ops time per trip
