

CollabAI

Secure AI adoption platform for teams that need control, visibility, and measurable business outcomes.

SaaS Solutions

Self-hosted + Open source

Custom AI Agents

THE AI ADOPTION PROBLEM IS NO LONGER AWARENESS.

Most teams already use AI. The gap is governance, integration, and measurable ROI.

CENTRALIZED AI GOVERNANCE

Employees use public tools without a shared policy or visibility.

UNIFIED WORK SURFACE

Consolidating AI capabilities into a single source of truth to reduce complexity and repetitive effort.

KNOWLEDGE GAPS

Company knowledge stays scattered across files, CRMs, drives, inboxes, and spreadsheets.

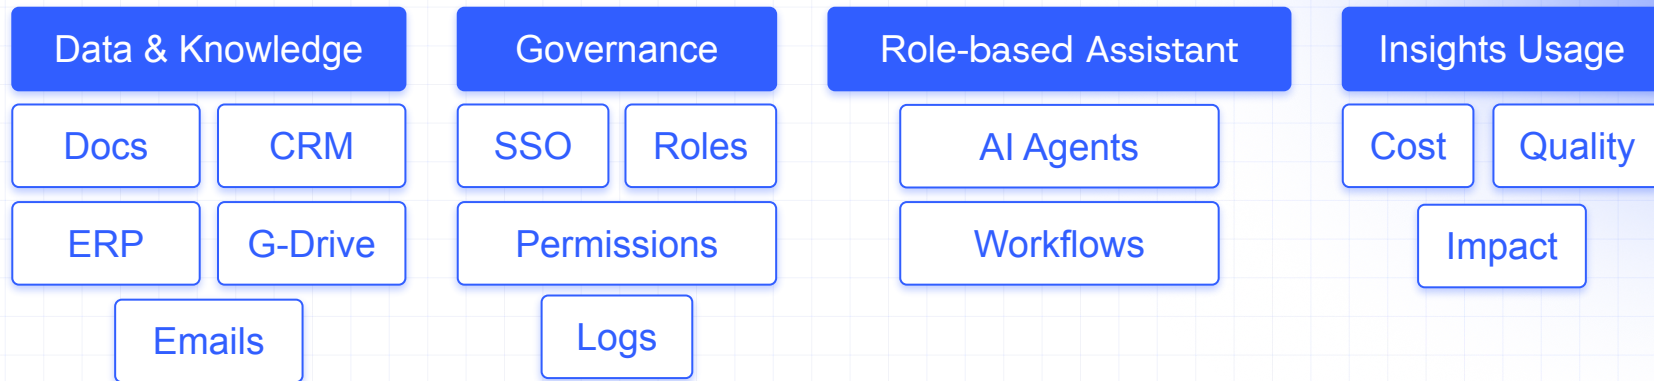

NO ROI VIEW

Management cannot see usage, cost, impact, or where AI is actually helping.

Move AI from “everyone trying different tools” to a controlled business operating layer: shared access, approved agents, secure knowledge, integrations, and adoption analytics.

WHAT Collab AI DOES

A secure AI layer that connects your knowledge, tools, users, and agents in one managed platform.

CollabAI does not force a rip-and-replace. It sits above existing systems and turns them into **usable AI workflows**.

- Self-hosted or dedicated deployment options
- Maintain total control over your data with enterprise-grade isolation and zero model training.
- Custom agents for teams, departments, clients, or vertical workflows

INTEGRATING AI SAFELY ACROSS YOUR ORGANIZATION

Move from experimentation to governed scale in five steps.

FOR LEADERSHIP

Visibility into AI usage, cost, adoption, and operational bottlenecks.

FOR TEAMS

Approved AI assistants that understand their work and reduce repetitive effort.

FOR IT & SECURITY

Controlled access, self-hosted data layer, audit trails, and policy-ready deployment.

FOR CUSTOMERS

Faster responses, better follow-up, fewer manual delays, and more consistent service.

A PRACTICAL ROADMAP FOR AI ADOPTION

1

ASSESS

Identify high-value workflows and risk areas.

2

CONNECT

Bring in knowledge sources and core tools.

3

GOVERN

Set SSO, roles, permissions, and usage rules.

4

DEPLOY

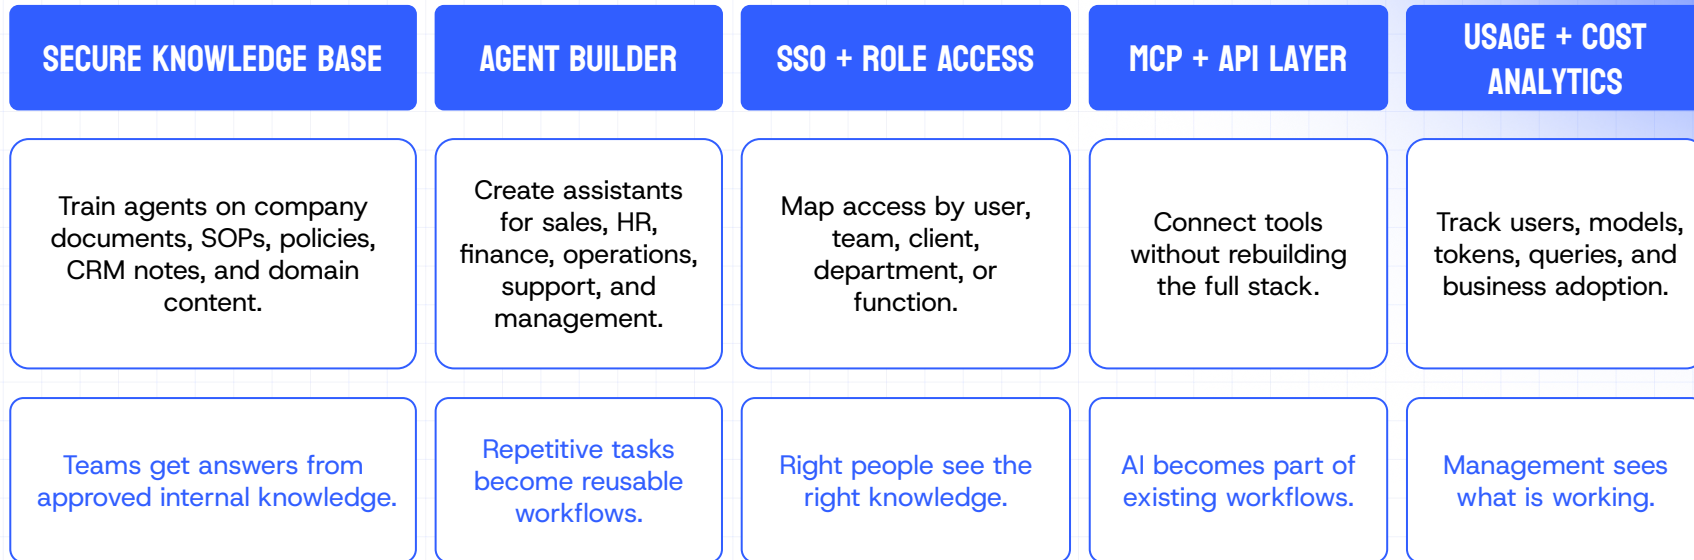

Launch role-based agents and workflow automation.

5

MEASURE

Track adoption, cost, quality, and ROI.

BRIDGING THE GAP BETWEEN AI TECH AND TEAM PRODUCTIVITY

Other platform modules: local/S3 storage, Supabase DB + vector search, branding customization, SMTP, license activation, async jobs, admin panel, and enhanced reporting.

EXPERT AGENTS, BUILT FOR YOUR BUSINESS

SALES ASSISTANT

Lead follow-up, CRM review, proposal support, meeting briefs

HR ASSISTANT

Policy Q&A, onboarding, training, internal FAQs

FINANCE ASSISTANT

Invoice review, recon, budget summaries, exception flags

OPERATIONS ASSISTANT

Daily reporting, process alerts, SOP answers, task summaries

EXECUTIVE ASSISTANT

KPI briefing, performance insights, risk flags, leadership reporting

TRAINING ASSISTANT

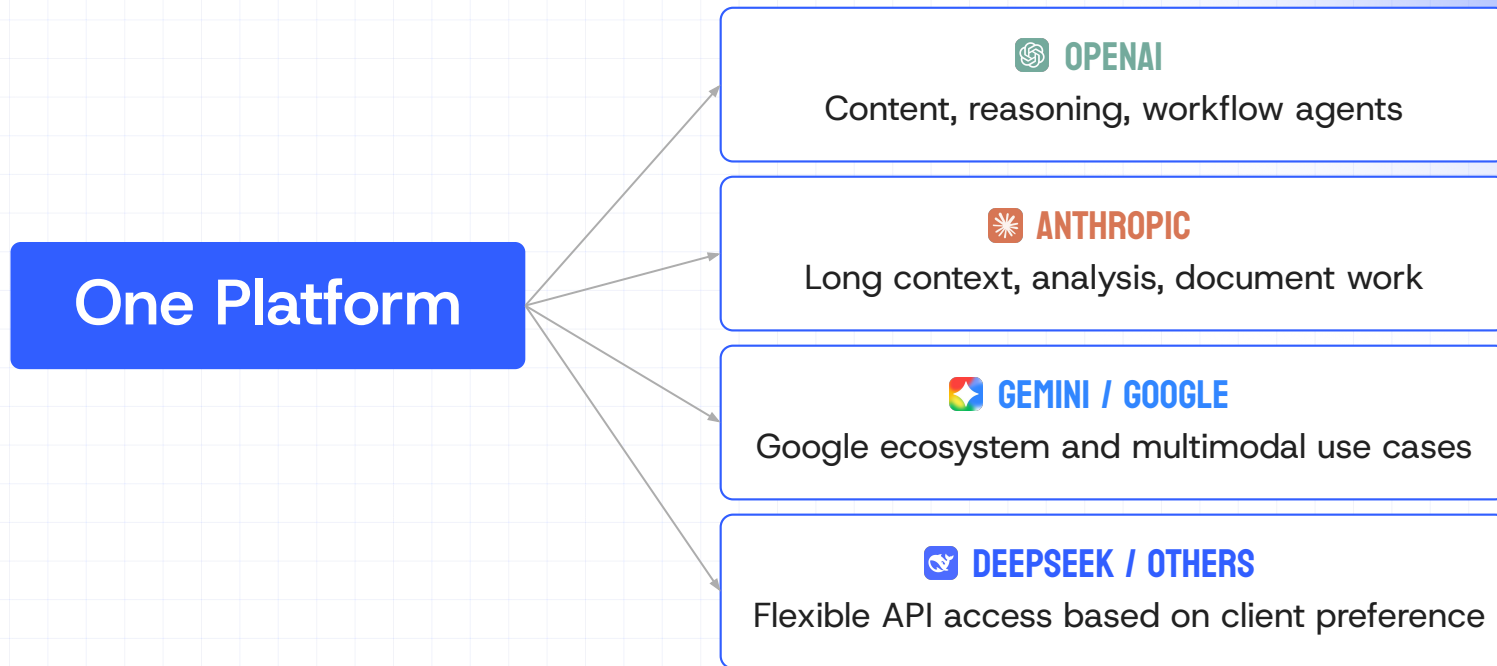

Internal academy, content Q&A, certification support, team learning

“Which workflow is causing the most manual follow-up today?”

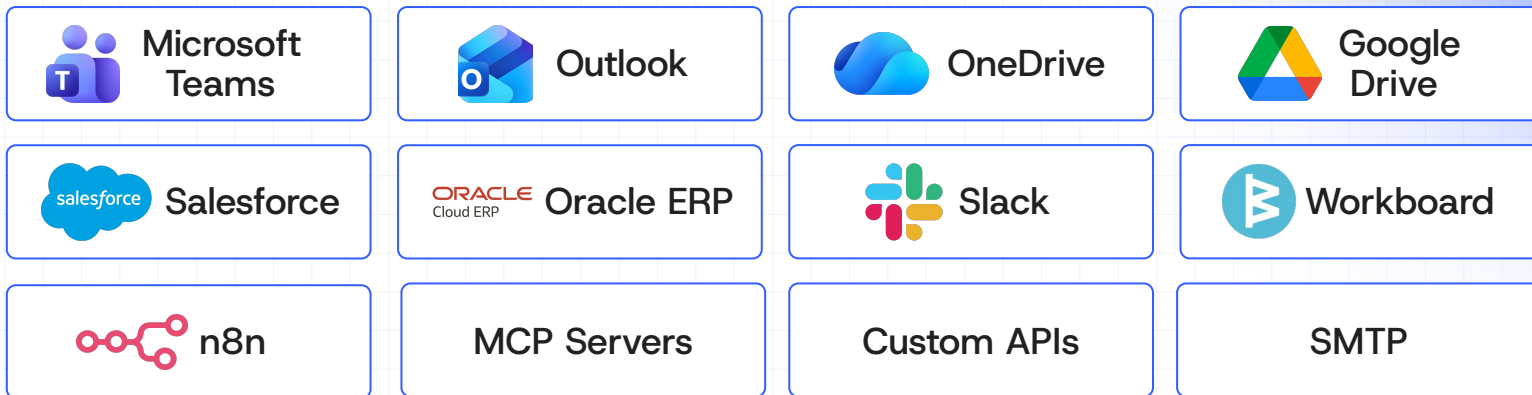

UNIFIED AI ACCESS WITHOUT LOCKING TEAMS INTO ONE MODEL

CollabAI can route work to the right model while keeping one governed interface for users.

BRIDGE THE GAP BETWEEN DATA AND DECISION

CollabAI connects to tools and turns existing data into action.

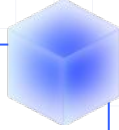

INTEGRATION EXAMPLES

- Synthesize answers from data scattered across all company drives and documents.
- Bridge the gap between chat and action by triggering n8n workflows instantly.
- Convert fragmented CRM and project signals into actionable executive briefings.

SECURITY-FIRST BY DESIGN

DATA OWNERSHIP

Knowledge base, user records, prompts, logs, and files can stay on client-controlled infrastructure.

ACCESS CONTROL

SSO, RBAC, team access, client/department separation, and admin-managed permissions.

ENCRYPTION

TLS in transit and encrypted storage options for application and database layers.

GUARDRAILS

Input/output filtering, human approval for critical workflows, and prompt controls.

MONITORING

Usage analytics, audit trails, automated backups, and operational dashboards.

POLICY FIT

Flexible deployment aligned to client IT, compliance, and procurement requirements.

TURN YOUR COMPANY'S DATA INTO COLLECTIVE ACTION

CLIENT CLOUD

Best for enterprises with strict IT policies. Deploy in the customer's AWS, Azure, or preferred cloud.

DEDICATED HOSTING

Best for mid-market teams that need isolation without managing infrastructure.

SJI MANAGED

Best for fast pilots. SJ Innovation manages setup, support, monitoring, and updates.

BYO API KEYS

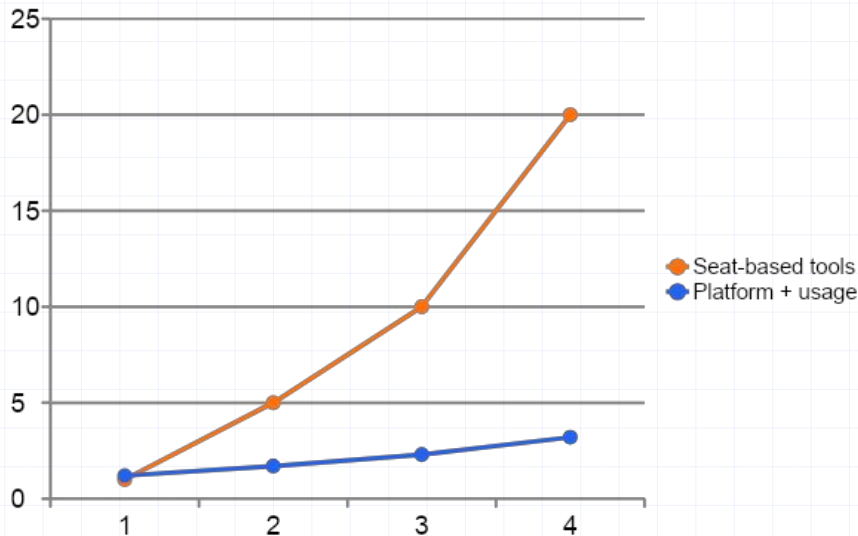

Best for procurement and control. Customer uses approved model-provider accounts or Azure OpenAI.

A COMMERCIAL MODEL THAT SCALES WITH REAL USAGE

Replace scattered seat-based experimentation with a governed platform and measurable adoption.

Illustrative relative cost index

HOW TO EXPLAIN IT

Seat-based AI costs rise directly with every user. CollabAI gives organizations a shared governed platform, then usage can be managed through API limits, team access, model routing, and adoption dashboards.

COMMERCIAL LEVERS

Platform Setup • Annual Platform License • Model/API Usage • Managed Support • Custom Agent Build-out • Integrations • Training and Adoption Support.

FROM FIRST WORKSHOP TO PILOT IN 30–45 DAYS

A simple implementation plan sales can confidently explain.

WEEK 1

DISCOVERY & AI READINESS

Use cases, data sources,
risk review, success metrics

WEEK 2

SETUP & CONFIGURATION

Environment, SSO, roles,
storage, model/API keys

WEEK 3-4

AGENT BUILD + INTEGRATIONS

Knowledge base, agent
prompts, tool/API connections

WEEK 5

TRAINING + UAT

Pilot users, feedback cycles,
guardrails, usage dashboard

WEEK 6

LAUNCH + SCALE PLAN

Production rollout, adoption plan,
roadmap, support model

COST COMPARISON: **COLLABAI** VS. OTHER PROVIDERS

Parameter	Microsoft Copilot	CollabAI	Gemini (Google)	Claude (Anthropic)
Base License Cost	\$30/user/month	One-time annual fee	Pay-per-token (~\$0.003–\$0.06/token)	Pay-per-token (~\$0.003–\$0.015/token)
Model Access	Copilot AI only	GPT-5 (& all latest models), Claude Opus 4.7, Claude Sonnet 4.6, Claude Haiku 4.5, Gemini 3.1 Pro (& all latest models), DeepSeek, Grok	Gemini	Claude 3.5 Sonnet, Claude 4
Monthly Cost (10 users)	\$3,000/month	~\$50–200/month (API costs only)	Pay-per-token (~\$150–300)	Pay-per-token (~\$150–300)
Annual Cost (10 users)	\$36,000	~\$1,000–3,000 total	Pay-per-token (~\$1,500–3,000/year)	Pay-per-token (~\$1,500–3,000/year)
Scalability	Linear cost increase per user	Fixed platform cost + API usage	Pay-as-you-go	Pay-as-you-go

BUILT-IN WORKFLOWS FOR EVERY SECTOR

NEVER MISS ANOTHER RATE LOCK
